

6th mixed culture PHA workshop @ IWARR2019

post-conference workshop @ IWA RR 2019
Venice, 11-12 September 2019

Call for Abstracts: How does your contribution bring us closer to addressing real-world bottlenecks, or help to de-risk investments in the steps from pilot to demonstration scale implementation of technology?

The 2-day technical workshop will be the forum to share ideas and experiences from more than 15 years in the mixed culture PHA production, technology developments, with emphasis on challenges, *and* successes.

The selected presentations and contributions will work to tie outcomes of theoretical and practical research initiatives to meaningful, and preferably, quantitative insights of MMC PHA production for scale-up in practice.

Site visits to the MMC PHA piloting research and development at Carbonera and Treviso WWTPs.

Main topics: Organic feedstock quality and supply; mixed culture biomass production and supply, and biomass quality management; PHA production and polymer quality; technoeconomic evaluations providing insight on scale up opportunities and challenges.

Target participants: Researchers, technology providers, innovative entrepreneurs and industries

Registration and fee payment with IWA
RR2019 website: Max 60 participants.
