Towards Circular Cities

pre-conference workshop @ IWA RRC 2019, Venice (IT)

8/09/2019 10:00-13:00 (TBC)

organised by the COST Action CA17133 Circular City

Content:

- The COST Action CA17133 Circular City (Implementing nature based solutions for creating a resourceful circular city; duration: 22/10/2018 – 21/10/2022, <http://www.circular-city.eu/>) aims to establish a network testing the hypothesis that: "A circular flow system that implements nature based solutions (NBS) for managing nutrients and resources within the urban biosphere will lead to a resilient, sustainable and healthy urban environment"
- Key representatives of the five Working Groups, i.e. Built environment, Urban Water, Resource Recovery, Urban farming and Transformation tools (connecting the WGs and the socio-economic impact) will present the state-of-the-art and will elaborate the way forward towards Circular Cities.

Target participants:

Water professionals, researchers, utilities, technology providers, policy makers, consultants, and market players and industries outside the water sector able to implement these new concepts.
