

## **Rene Rozendal**

*Chief Technology Officer of Paques*

René Rozendal has been the Chief Technology Officer of Paques since October 2015. He graduated in biochemical engineering (with honours) at the Delft University of Technology followed by a PhD (with honours) in Environmental Technology at Wageningen University and Wetsus, centre of excellence for sustainable water technology. He is currently doing an MBA at IMD in Lausanne, Switzerland. After finishing his PhD, he worked as a research fellow at the Advanced Water Management Centre of The University of Queensland. In 2011, he moved back to The Netherlands to work for Paques, a globally operating company focused on industrial wastewater and gas treatment. At Paques he leads an R&D group of ~25 people with a strong focus on resource recovery.
